# Autumn Price List

of

# Hardy Lilliums

and

# Dutch Bulbs

1936

OFFERED BY

WILLIAM N. CRAIG

Front Street at Federal

WEYMOUTH, MASS.

Telephone Weymouth 1110

## WILLIAM N. CRAIG, WEYMOUTH

---

A very cordial invitation is extended to all interested in hardy gardening to look over our gardens. May is a good time to see Dutch Bulbs, Lilies are in season from early June until mid-October, Herbaceous Perennials are in flower from April until December. Even in winter we usually have some bulbs or herbs showing flowers in warm locations.

The great fluctuations in currency since the United States abandoned the gold standard which Holland still retains, and the added fact that the Dutch Government which now controls the bulb industry has fixed minimum prices below which no firms are allowed to sell, in order to stabilize the industry, has made moderate advances in prices necessary particularly in the case of tulips but advances made in this list are very moderate and we invite a comparison with others handling the same high grade of bulbs.

A reduction in the duty on tulip bulbs makes it possible to offer these at rather better prices, a lifting of the embargo on Narcissus in December 1936 comes too late to affect values the coming season but will benefit buyers the following year. It is well to bear in mind that the United States purchases barely 10 per cent of the bulb exports of Holland only one-sixth of those of Great Britain, it is hoped that this percentage will be increased a year hence with the admission of Narcissus which are steadily increasing in favor here.

Having a very low overhead cost we can offer attractive prices. A cordial invitation is extended to all interested in bulb culture to inspect our extensive stocks. Nearly all Dutch bulbs are here by September 15, many much earlier.

## LILIUMS

are our leading specialty. We grow these in thousands in Weymouth in full sunshine, and our collection is without a rival in New England. From a very small beginning a few years ago a large business has been built up in these glorious hardy bulbs, and shipments are made to all parts of the United States as well as Canada, Great Britain and other countries. Virtually every variety listed may be found growing here and unlike the majority of dealers we are not dependent on bought in stock, except in the case of a few varieties. The superior advantages of home grown bulbs with their greater plumpness must be apparent to every grower of these beautiful bulbous plants.

Some varieties like *candidum* and *testaceum* are ready in August, a very large number are to be had in September, and this month and October are the best in the year for the planting of the great majority of Lilies. The *auratums*, *speciosums*, *sulphureums*, and a few other varieties can be planted later and it is better to get these in during late fall rather than wait until spring. Some of our most successful plantings of Lilies have been made in late December and January, removing a crust of frost to get them into the ground. Very little winter covering is necessary for Lilies, our own beds get virtually nothing at all. So long as drainage is good there need be no fear of Lilies winter killing. To extend the flowering season plantings of such varieties as *speciosum*, *auratum*, *Henryi*, *regale*, *sulphureum*, *elegans*, *tigrinum* and some others can be made in spring.

Our first Lilies to open in 1936 were *tenuifolium* and *monadelphum*, both during late May, the greater number of Lilies bloom during June and July but quite a number flower later and we usually have *speciosums*, *Formosanums* and *sulphureums* until mid-October which makes a fairly long season.

Plant *candidum* only 1½—2 inches deep, *testaceum* and *chalcedonicum* not over 3 inches. All varieties making roots only from below the bulbs should be planted shallow. Stem rooters like *regale*, *auratum*, *speciosum*, *Henryi*, *sulphureum*, *Sargentiae*, and *Willmottiae* require covering 8 inches and even more is better should soil be very light. European varieties like *candidum*, *chalcedonicum*, *monadelphum*, *martagon*, *testaceum* and *Pyrenaicum* like a well sweetened soil while the Asiatic varieties either prefer one which is alkaline or neutral. *Regale* seems to grow equally well in an acid as a sweet soil. Some varieties like *candidum*, *testaceum*, *chalcedonicum*, *martagon*, *Japonicum* and *rubellum* are best laid on their sides at planting time, all should be bedded in sand and covered with it before being filled in.

Very retentive soils may be improved by adding peat moss, sharp sand and fine coal ashes. As a summer mulch peat moss is excellent, but do not use it for the European varieties. Where the more tender and doubtful varieties are being tried it will assist very much to lay strips of tar paper over the plantings to shed water in winter.

Lilies are effective in perennial borders, but when planted there should not go too near husky growing plants, when mulching beds with manure avoid scattering it over the Lilies. In beds or borders by themselves with a background of evergreen or not too robust deciduous shrubs Lilies do remarkably well, a groundwork of violas, or *Nepeta Mussini* may be used if desired. In rhododendron or azalea beds *auratum*, *superbum*, *paradalinum*, *Canadense*, *Henryi* and *Grayi* do well but do not use any of the large bulb rooting

varieties. For the wild garden our native varieties like *Philadelphicum*, *Grayi*, *Canadense*, *superbum* and *pardalinum* are good, so is *tigrinum*, the *elegans* and *umbellatum* varieties, and *croceum*. For rock garden plantings some of the best varieties are *tenuifolium*, *Golden Gleam*, *amabile*, *rubellum*, all of the forms of *elegans*, *concolor*, *callosum* and *cernuum*. Numerous varieties are fine for pot culture including *regale*, *speciosum*, *auratum*, *Henryi*, *Japonicum*, *sulphureum*, *Batemanniae*, *Croceum* and others.

Beds entirely devoted to Lilies in a range of varieties to flower over a long season are becoming popular. Such beds should be well prepared as regards drainage. Low growing annuals or perennials can be used as a ground cover and will furnish a suitable summer mulch.

Our displays of Hardy Lilies have secured numerous awards of gold and silver medals at exhibitions during the past few years. On June 28, 1933, an exhibit of 60 varieties in Boston on the occasion of the annual convention of the American Rose Society was awarded a gold medal, this contained a number of new and rare varieties.

We wish to draw special attention to our collection of *Lilium* seeds which is the most complete offered in America. Many varieties will germinate within 3-4 weeks and a few will bloom the second season. If started under glass in heat certain kinds can be flowered the same year including *Formosanum*. We have made shipments of *Lilium* seeds to France, Great Britain, Soviet Russia, Japan, British Honduras, Cuba, South Africa, New Zealand and Italy.

### LIST OF HARDY LILIUMS

<b>Amabile.</b> A charming stem rooting Lily blooming in mid-June and attaining a height of 18-24 inches. Color bright red spotted black, and with some chocolate blotches, a very good variety for the rock garden.	\$.30 each, \$3.00 doz., \$20.00 per 100
<b>Auratum (Golden rayed Lily of Japan).</b> Massive flowers with distinct gold bands and heavily spotted. Very fragrant, blooms in August .....	25-.50 each, 3.00-5.00 doz.
<b>Auratum Var. Pictum.</b> Heavily spotted with rich crimson, very fine form .....	.75-1.00 each, 9.00 doz.
<b>Auratum Var. Platiphyllum.</b> Carries broader foliage and the largest flowers of any of the auratums, more lightly spotted than in the type and often entirely spotless... .30-.50 each, 4.00-6.00 doz.	
<b>Auratum Var. Rubro-Vittatum.</b> The flowers of this form are heavily blotched and spotted dark rosy pink, very distinct .....	1.00 each, 10.00 doz.
<b>Auratum Var. Virginale (Wittei).</b> Beautiful snow white broad petalled flowers, a very lovely variety... .75 each, \$8.00 doz.	

**NOTE**—This year we have ordered all bulbs of auratums to be shipped with roots attached. In the past all roots have been removed before export and this has no doubt been in some measure responsible for the very unsatisfactory way in which they have grown and flowered in many cases.

	Each	Doz.
<b>Backhouse Hybrids.</b> This grand race of Lilies was raised by the late Mrs. R. O. Backhouse in England. They are the results of crosses made between Martagon and Hansonii, two very excellent Lilies. The available stock of these in the world is still quite limited. All bulbs offered are of blooming size and these will attain a height of 5—6 feet within two years.		
<b>Brocade.</b> Very vigorous. Color orange yellow, rosy pink without, interior dotted and marbled pink and chocolate .....	3.00	
<b>Mrs. R. O. Backhouse.</b> A superb and very vigorous hybrid color orange yellow spotted purple .....	3.00	
<b>Sceptre.</b> Extremely vigorous, attaining a height of 6 feet. As many as 40 of the star-shaped flowers, which are orange colored with a pinky buff shading, are carried to a stem ....	3.00	
<b>Sutton Court.</b> The reflexing orange yellow flowers of this variety are heavily spotted with purple, exterior of petals is shaded with pink and interior with pale yellow. Very robust .....	3.00	
<b>Bolanderi.</b> Californian lily with reddish purple flowers, spotted dark purple. Something in the way of Columbianum .....	.75	
<b>Batemanniae.</b> A superb lily blooming in late July. The stems attain a height of 3—4 feet and this season many carried 15-25 flowers each. The upright facing flowers are of a rich orange apricot color. We have a grand stock of this splendid lily.		30.00 per 100
<b>Browni Odorum.</b> An early July flowering Lily with large trumpet shaped flowers purplish without and creamy white within. Distinct fragrance .....	1.00	10.00
<b>Browni Colchesteri.</b> Cultivated bulbs secured originally from England. A very fine form. This Lily needs a warm and very well drained location. Is excellent for pot culture.....	.75	8.00
<b>Bulbiferum.</b> A native of Central Europe this lily proves to be a good grower in North America. The bright orange red flowers are dotted deep purplish black and tinged or blotched yellow in the centre. Flowers in early June .....	.50	5.00
<b>Callosum.</b> Flowers are orange red, unspotted, reflexed in the same way as superbum and Chalcedonicum, loves full sunshine, blooms late July .....	.30	3.00
<b>Canadense.</b> A beautiful and graceful native lily succeeding well in either sunshine or shade. Fine either in the garden or for naturalizing. The drooping reflexing flowers are yellow to reddish in color, heavily spotted within .....	20 each, 2.00 doz.,	12.50 per 100
Extra Big Cultivated Bulbs	.40 each, 4.00 doz.,	30.00 per 100

	Each	Doz.
<b>Canadense Flavum.</b> The yellow form of the Canadian lily. Succeeds splendidly in full sunshine but will also thrive in fairly heavy shade.	.25 each, 2.00 doz.,	15.00 per 100
<b>Canadense Rubrum.</b> The red form of this charming lily.	.25 each, 2.50 doz.,	18.00 per 100
<b>Candidum (Madonna Lily).</b> The most immaculate of all hardy lilies. Likes a well sweetened soil. Requires shallow planting not over 1½-2 inches deep. Lay bulbs on their sides after rolling in sulphur, pack well in sand. As this Lily makes a rosette of leaves in late summer, early planting is desirable. Looks well associated with Delphiniums but do not allow perennials to crowd them too much. We handle both home grown and North of France bulbs.	.25-.35-.50 each, 3.00-4.00-6.00 doz. \$20.00-30.00 to 45.00 per 100	
Some enormous bulbs .....	.75	\$8.00 doz.
<b>Candidum Peregrinum.</b> The black stemmed form of Candidum, not at all common, freer from disease than the type. Best imported bulbs from England .....	.75	8.00
<b>CANDIDUM, Salonica variety.</b> This magnificent form of candidum has been well tested in Europe for several years where spikes 6-7 feet high carrying up to 25 or more flowers each have been produced. The flowers are slightly larger than in the type in common culture today, and plants grow taller, the great point about them however is their freedom from the botrytis disease which often badly affects the old type. We are very glad to be able to offer a splendid lot of clean, strong flowering bulbs of this very superior variety.	.40-.50-.75 each, 4.00-6.00-8.00 per doz.	
<b>Carolinanum.</b> Similar to superbum but is smaller and less husky, loves sunshine .....	.40	4.00
<b>Centifolium.</b> A magnificent new lily of great vigor and hardiness, introduced by the late Reginald Farrer. The immense pure white trumpet shaped flowers are flushed with yellow at the base of the trumpet, outside the trumpets are streaked with green and light brown. Stem rooter and requires deep planting. This seems destined to become one of our dominant garden lilies when stocks increase. Needs good winter protection. Good flowering bulbs.....	1.50-2.00	each
<b>Cernuum.</b> This Chinese lily has grass-like foliage and very wiry stems. Flowers are lilac rose in color, spotted wine color, fragrant and the plants are similar to tenuifolium in habit. Quite a scarce lily .....	.35	4.00
<b>Chalcedonicum (Scarlet Turks Cap Lily).</b> A native of Greece and one of the parents of testaceum. The		

	Each	Doz.
brilliant scarlet recurving flowers are produced in July.		
Extra large bulbs .....	1.50	15.00
Strong flowering bulbs .....	1.00	10.00
<b>Columbianum.</b> A fairly dependable variety from Oregon and other Pa- cific coast states. The color is golden yellow, spotted red, likes a moist location in summer .....	.35	4.00
<b>Concolor.</b> This charming rock garden lily comes to us from Siberia, it is an early bloomer with rich crimson scarlet flowers facing upwards, rare- ly exceeds 18 inches in height. Fol- lows <i>tenuifolium</i> in its season of bloom .....	.35	3.50
<b>Coridion.</b> Resembles <i>concolor</i> in its habit of growth. Color deep yellow with dark spots .....	.40	4.00
<b>Creelmanni (Creelman Lily).</b> A superb hybrid raised in Canada between <i>regale</i> and <i>Sargentiae</i> . Intermediate in habit and flower, but much later flowering. Extra large bulbs .....	3.00	
<b>Croceum.</b> This is the true old orange lily of British gardens where it is seen growing luxuriantly on every hand, grows much taller than <i>um- bellatum</i> and blooms later, not in- frequently carrying 16—20 flowers to each stem. Color rich orange, one of our very best lilies .....	.40	4.00
<b>Davidi (Thayerae).</b> This rather scarce Chinese lily is of graceful habit and while the flowers are similar to those of <i>Willmottiae</i> they are produced later, it has a sturdier stem however. Flowers are cinnabar red in color and the foliage is narrow and grass-like. Extra strong flowering bulbs .....	1.00	10.00
Second sized bulbs of flowering size	.50	5.00
<b>Davuricum.</b> A handsome Siberian lily flowering early, usually <i>umbellatum</i> is sold for it, the flowers more nearly resemble our native <i>Philadelphicum</i> than any other variety being orange red in color, spotted black, upright and rather cup shaped .....	.30	3.00
<b>Dalhansoni.</b> A splendid hybrid between <i>martagon</i> <i>Dalmaticum</i> and <i>Hansonii</i> with great vigor and much of the coloring of the darkest of the marta- gons. Bulbs scarce .....	2.50	
<b>Duchartrei Farreri.</b> One of the late Reginald Farrer's introductions and referred to by him as resembling a “white marbled martagon.” This does fairly well in New England and is a very charming Lily .....	2.00	
<b>Elegans (Thunbergianum).</b> A dwarf growing and early flowering type of lilies coming in several colors. Good both for the border and the rock gar- den as well as the wild garden. There are some very fine forms of this easily grown lily. Fine mixture.		
	.20 each, 2.00 doz.,	15.00 per 100
<b>Elegans Alice Wilson.</b> An excellent yellow form, dwarf and carrying extra large flowers, also forces very well .....	.50	5.00

		Each	Doz.
<b>Elegans Aureum Nigro-Maculatum.</b>	Apricot yellow with black spots ....	.25	2.50
<b>Elegans Atro-Sanguineum.</b> Dark red, crimson in centre .....	.25	2.50	
<b>Elegans Leonard Joerg.</b> A good deep apricot variety with black spots.	.30 each, 3.00 doz.,	22.50 per 100	
<b>Elegans marmoratum aureum.</b> An excellent pure yellow form 8 inches in height .....	.40	4.00	
<b>Elegans Peter Barr.</b> Fine golden yellow variety, lightly spotted .....	.40	4.00	
<b>Elegans Red Star.</b> Splendid red, suffused with orange .....	.40	4.00	
<b>Formosanum (Philippinense Formosanum).</b> We are now using the European name for this fine lily, as bulbs of this hardy form are from Formosa and not the Philippines the older name should be dropped. This is the most remarkable lily introduced in late years, its ease of culture with its facility of increase from seeds makes it come within the range of everyone with a garden. Seeds sown early will produce flowering plants easily the same year. Has a wiry stem, long graceful leaves, trumpets are much longer and narrower than those of regale but similar in color, there is a pure white form favored for forcing but outdoors we much prefer the variety with the exterior of the trumpets pleasingly colored. Heavy stem rooter.			
<b>Early Variety.</b> This starts blooming outdoors as regale finishes, plant 8 inches deep. Height 2-2½ feet.			
<b>Late Variety.</b> Blooms from mid-August until late October, grows taller than the early variety, sometimes 6-8 feet. Price of both forms			
	.30 each, 3.00 doz.,	20.00 per 100	
<b>Grayi.</b> Named in honor of Prof. Asa Gray, the noted botanist. Coming to us from the mountains of Virginia and North Carolina, this lovely and graceful lily takes kindly to garden culture in New England. The pretty red tubular shaped flowers are yellow, spotted brown and are very freely produced. Prefers some shade like many other lilies, but thrives well in full sunshine.			
	.35 each, 3.50 doz.,	25.00 per 100	
<b>Giganteum Himalaicum.</b> Not to be confounded with the form of longiflorum going under the name of giganteum, this is the tallest growing and most noble of all lilies. Not a plant for the open garden, the ideal place for it is in an open glade in a piece of woodland where it can be sheltered from strong winds. The large bulbs should be planted shallow in soft mucky ground in which coarse sand has been freely mixed. Spring planting is best. The large tubular shaped flowers are semi-pendant and pure white in color with			

Doz. 100

a purplish tint near the base and purple midribs, the flowers are very fragrant.

Strong bulbs ..... 2.00-3.00 each, 22.50-33.00 doz.

**Hansonii.** Hanson's lily is easily one of the best 6 varieties in cultivation. Leaves are carried in whorls and persist until quite late. The yellow flowers are slightly reflexed, yellow in color with brown spots and fragrant. Succeeds well in both sunshine and shade. A late June bloomer.

Extra large bulbs ..... .50 5.00

Strong flowering ..... .35 4.00

**Henryi.** Sometimes called the "yellow speciosum." The orange yellow reflexing flowers are produced in August and early September. This lily produces very big bulbs, often attains a height of 7-8 feet or more, and is not only very floriferous but absolutely dependable, carries very rich green foliage. Must be planted

8-10 inches deep for best results ... 25, .40, .60 each

2.50, 4.00, 6.00 doz.

\$20.00, 30.00, 40.00 per 100

**Horsfordi.** This charming hybrid was raised by the late F. H. Horsford at Charlotte, Vermont, and is still very scarce. It is the result of crossing *L. Maximowiczii* and *L. Batemanniae*, the flowers which are quite large and reflexed are of a lovely apricot yellow color and open late in July .....

1.50

**Humboldtii Magnificum.** One of the best of the Californian lilies. Has done very well with me in the open but thrives better in an open woodland glade where it will be protected from cutting winds. Flowers in form resemble superbum but are more heavily spotted with purple. Strong cultivated bulbs, far superior to those collected .....

.60 7.00

**Japonicum (Kramerii).** The most lovely of pink Japanese lilies. This has done amazingly well outdoors with me even when planted as late as Christmas week, many stalks have carried 6—7 flowers each in the open field and unprotected. The stories told in many catalogues that this lily is delicate and must be pot grown altogether is pure nonsense. Give it well drained soil, use plenty of sand around the bulbs laying them on their sides. Flowers mainly in July but will persist until well into August. Makes a fine variety also for pot culture.

.50 each, 5.00 doz., 35.00 per 100

**Kelloggi.** A very dainty and pretty Lily from North Western California, the stems attain a height of 2—4 feet, flowers are pink spotted purple and are fragrant, likes a well drained position in a rockery, or on the banks of a sloping piece of woodland .....

.50 5.00

Each Doz.

<b>Longiflorum foliis albo marginata.</b> A hardy form of the Easter lily with very attractive variegated foliage, also makes an excellent pot plant.	.50 each, 5.00 per doz.
<b>Longiflorum Giganteum.</b> This, the popular lily for Easter forcing, is also a grand variety outdoors in New England. Plant in November 8—10 inches deep. Flowers produced in the open are very much larger than under glass and quantities of large bulblets will be found on the stems at digging time, some of these will flower the next season. Proves perfectly hardy.	
Extra large bulbs .....	.50      5.00
<b>Longiflorum Harrisii.</b> The earliest flowering of the longiflorum varieties under glass this variety has with us flowered latest outdoors, nor has it grown so tall as either giganteum or formosum. Bulbs of this lily are ready early in August. We find this Lily perfectly hardy but outdoor planting should be delayed until late October.	
Extra fine bulbs .....	.50, .75 each, 5.00, 8.00 doz.
<b>Longiflorum Erabu.</b> A fine variety from the island of Erabu, now much grown for Easter flowering succeeding in a cooler temperature than giganteum, proves perfectly hardy in New England, blooming in July ...	.50      5.00
<b>Marhan.</b> A fine hybrid lily raised between Martagon and Hansonii, has a fine constitution. Flowers are fairly intermediate in character. Good flowering bulbs .....	1.50
<b>Marhan. var. Ellen Willmott.</b> A lovely hybrid between Martagon album and Hansonii. Color clear orange with reddish brown spots and streaks extremely vigorous .....	1.50
<b>Martagon.</b> The old purple martagon lily often attains a height of 6 feet, carrying up to 30 flowers per stalk. Flowers in mid-June near Boston, cover 4 inches. .25 each, 2.50 doz.,	18.00 per 100
<b>Martagon Album.</b> The white martagon lily produces its waxy white recurving flowers a few days later than the purple variety, it is one of the most lovely and graceful lilies in cultivation, has a strong constitution.	
Large bulbs .....	.65      7.00
Fine bulbs .....	.50      5.00
<b>Martagon Dalmaticum.</b> One of the finest forms of martagon, very robust flowers are occasionally wine red in color but usually deep glossy purple appearing black in the distance. Choice and scarce .....	2.50
<b>Martagon Cattanae.</b> Rich glossy blackish crimson flowers, a remarkable form, very scarce .....	3.00
<b>Maritimum.</b> This Californian Lily is rather closely allied to the better known Canadense. The reflexed orange yellow flowers are tipped red and spotted light purple .....	.60      6.50

	Each	Doz.
<b>Maximowiczii.</b> A late August flowering lily, resembles tigrinum a little in habit and flowers but is a later bloomer and rather less vigorous. The recurring red flowers are spotted purplish brown. Cover bulbs 6—8 inches .....	.35	4.00
<b>Maxwill.</b> A splendid hybrid between L. Maximowiczii and Willmottiae, raised in Canada. Has a rather sturdier stem than Willmottiae and is a little lighter in color. A splendid garden lily .....	2.00	
<b>Medeoloides.</b> A good rock garden lily of martagon habit, flowers are scarlet, shaded apricot and occasionally spotted black .....	.50	5.00
<b>Michiganense.</b> Presumably a natural hybrid between Canadense and Superbum flowering in late July. Very attractive and a good grower .....	.40	4.00
<b>Monadelphum Szovitzianum (Colchicum).</b> A very beautiful lily from the Caucasus. Likes very well drained ground and if a sheet of tar paper is spread over the bed in winter to exclude water they will do all the better. The rich yellow fragrant flowers appear in early June arranged like pendulous bells around a sturdily graceful stalk. Extra fine bulbs .....50, .75 each, 5.00, 7.00 doz.		
<b>Occidentale.</b> Believed to be a hybrid between maritimum and pardalinum. Flowers are deep blood red with a few maroon spots in centre, loves moisture. A very rare variety .....	.75	
<b>Ochraceum.</b> Often confounded with Nepalense from which it is quite distinct. Shows much variation in both flower and leaf. Color is yellow but not of one fixed shade, usually the tube is heavily stained with wine purple, a fine lily for pot culture and may prove amenable to open air conditions when better understood. Strong bulbs .....	2.00	
<b>Pardalinum.</b> A very good Pacific Coast lily flowering in July. Of vigorous habit and easily attaining a height of 5—6 feet. The recurring flowers are bright orange in color spotted with deep crimson .....	.25	2.50
<b>Pardalinum Giganteum.</b> A magnificent form with larger and much more brilliant flowers than the type, possesses great vigor, our plants this year attained a height of 8 feet. We offered this variety for the first time in the east in 1930 and it has made good everywhere. .50, 1.00 each, 5.00, 10.00 doz.		
<b>Parryi.</b> A lovely Pacific Coast lily growing 4 feet in height. Lemon yellow in color with light chocolate brown spots, has a delicate fragrance. Likes plenty of leaf mold or peat moss and a moist location. Cultivated bulbs .....		
<b>Parvum.</b> A very pretty and graceful Lily from the Sierra Nevada Moun-	.75	8.00

	Each	Doz.
tains which succeeds very well in the eastern states. Flowers are recurving, orange yellow in color and 1½ to 2 inches across .....	.50	5.00
<b>Parvum Luteum.</b> A pure yellow form which is very highly prized. One of the most charming of our Pacific Coast Lilies .....	.50	5.00
<b>Philadelphicum.</b> A fine lily native to our eastern states. The cup shaped flowers are of large size and carried 1—6 to a stalk. The orange colored flowers shade to scarlet at the tips and are rather heavily spotted, prefers shade and some low herbage to cover the ground.	.20 each, 2.00 doz., \$12.50 per 100	
Extra large bulbs .....	40¢ each, 4.00 doz.	
<b>Philippinense Formosanum</b> (See Formosanum).		
<b>Pomponium.</b> A native of Italy this lovely lily resembles Chalcedonicum but blooms much earlier. Seems to prefer a heavy soil with some grit added and likes lime .....	.50	5.00
<b>Pride of Charlotte.</b> A truly superb new Lilium raised in the cold region of Northern Vermont. One which has stood the test of severe winters and hot summers and has come through unscathed when many regales, Sargentiae and other varieties suffered severely. It flowers in late July and is a very sturdy grower with trumpets rather more constricted than those of regale but much longer. The inner portion of the trumpet is white with a soft sulphury suffusion, the outer part resembles Sargentiae of which this is a very much glorified form. It produces large dark colored bulbils abundantly, these starting to bloom the second year. It also seeds quite freely.		
Strong flowering bulbs .....	2.00—3.00	each
<b>Princeps.</b> A hybrid between regale and Sargentiae and in our estimation better than either parent. This superb lily was raised at the Dominion Experimental Farms, Ottawa, Ontario. It greatly extends the regale season as it flowers nearly a month later, the immense trumpets are larger and purer than those of regale, the exterior of the trumpet having hardly any trace of the brownish purple coloring seen in regale, being green and white.		
Strong flowering bulbs .....	1.50	15.00
Good flowering bulbs .....	1.00	10.00
<b>Pyrenaicum.</b> The yellow turks cap lily from Europe blooms with tenuifolium in early June carrying many small greenish yellow flowers with brown spots. The foliage is graceful. Bulbs are large and should be covered 6 inches .....	.50	5.00
<b>Regale.</b> Easily the most widely planted and popular lily in America today. Succeeds under widely different conditions and is hardy, vigor-		

	Each	Doz.
ous, floriferous, disease proof and absolutely dependable. The fragrant flowers have a delicate pink suffusion with a sulphury throat, externally the colorings show reddish brown through the white. We have a big stock of this glorious lily and have this season marked prices down substantially.		
Extra big bulbs, 9—11 in. size,		
	.50 each, \$5.00 doz., 40.00 per 100	
Large flowering bulbs,		
	.40 each, 4.00 doz., 30.00 per 100	
Good flowering bulbs,		
	.25 each, 2.00 doz., 18.00 per 100	
Small flowering bulbs,		
	.15 each, 1.50 doz., 10.00 per 100	
Bulbs to flower a year later,		
	.50 doz., 3.00 per 100	
Some mammoth sized bulbs,		
	.75 each, 8.00 doz.	
<b>Regale X Browni.</b> Another fine late blooming hybrid, just as vigorous as regale and with the Browni coloring outside the trumpets .....	1.00	
<b>Roezlii.</b> A moisture loving Lily from California, does very well in New England, stem rather slender, leaves long, slender and crowded, flowers are of a clear reddish orange, recurving and are dotted maroon .....	.50	5.00
<b>Roezlii, Crimson Form.</b> This is like the type but the flowers are of a deep blood red lightly dotted maroon, long slender foliage .....	.50	5.00
<b>Rubescens.</b> This is the Redwood or Chemise Lily. Tall slender stalks and very fragrant tubular flowers, these are white with purple dots when opening changing to deeper purple, and varying shades may be seen on the same plants. Give very good drainage .....	.50	5.00
<b>Rubellum.</b> A pretty very early flowering dwarf lily, fine for the rock garden in well drained pockets, the flowers are rather light pink in color and tube shaped, is also fine for pot culture .....	40 each, 4.00 doz.,	30.00 per 100
<b>Sargentiae.</b> Mrs. Sargent's lily flowers about three weeks later than regale, the large tubular flowers are pure white within, outside they are reddish brown. Plant at least 8 inches deep, be sure soil is well drained and this lily will thrive with you although not to the same degree as regale .....	.75	8.00
<b>Shuksan.</b> This is the best of the several hybrids raised by the late Dr. David Griffiths between pardalinum and Humboldti magnificum. Does very well in the east proving superior to the Humboldtis.		
Strong flowering bulbs .....	1.50	
<b>Shelburne Hybrid.</b> A very fine and vigorous hybrid between Sargentiae and regale raised in Shelburne, Vermont, resembles a much glorified Sargentiae but is a hardier and huskier grower than that variety .....	1.50	16.50

Each Doz.

<b>Speciosum Album.</b> Large reflexing pure white flowers which are in season outdoors from mid-August until October. Also good for pot culture.	.55-.50 each, 4.00-6.00 doz. 27.50-45.00 per 100
<b>Speciosum Album Kraetzeri.</b> A striking pure white form with green bands running down the centre of each petal .....	.50 6.00
<b>Speciosum Magnificum.</b> The large recurving flowers are rich carmine pink, margined white, a very fine variety .....	25-.50 each, 3.00-5.00 doz. 20.00-40.00 per 100
<b>Speciosum Melpomene.</b> Dark carmine shaded purple, heavily spotted and margined white, an extra richly colored form.	.40-.50 each, 4.00-6.00 doz., \$30.-40.00 per 100
<b>Speciosum Rubrum.</b> Carries both green and dark stems with rose colored flowers of varying shades.	.25-.50 each, 2.50-5.00 doz., \$20.-40.00 per 100
<b>Sulphur-Gale.</b> A fine hybrid between sulphureum and regale, very vigorous and hardy, extends the flowering season for regales. The flowers are in form like sulphureum and approximate regale in color .....	.50 5.00
<b>Sulphureum.</b> A superb late flowering lily from Upper Burmah which proves perfectly hardy in New England. The immense trumpet shaped flowers are pale yellow within, deepening towards the throat, the outside is tinted brownish red. Is also grand for pot culture. A late blooming variety attaining a height of 5—6 feet. Good flowering bulbs .....	1.00 10.00
Extra large flowering bulbs .....	1.50 16.50
<b>Sutchuenense.</b> Somewhat similar to Willmottiae but has a much sturdier stem and the flowers are spotless, an exceptionally fine Lily. Stock limited .....	1.50 15.00
<b>Superbum.</b> A magnificent North American lily, thrives in sunshine or partial shade, especially fine in rhododendron beds where it will attain a height of 10 feet. The bright orange recurring flowers are heavily spotted, likes a moist soil but demands good drainage like all lilies. Very large cultivated bulbs,	.40 each, 4.00 doz., 30.00 per 100
Strong flowering bulbs,	.20 each, 2.00 doz., 15.00 per 100
<b>Tenuifolium.</b> Our earliest flowering lily each year is the Siberian coral lily, in 1936 the first flowers opened on May 27. A gem for the rock garden. Graceful foliage and brilliant recurring red flowers carried 6—20 on a stem. This lily, under good conditions grows 3—5 feet high and we have counted 35 flowers to a stalk. Should be in every collection. Extra large bulbs,	.40 each, 4.00 doz., 30.00 per 100
Strong bulbs,	.25 each, 2.50 doz., 15.00 per 100

Each Doz.

<b>Tenuifolium Golden Gleam.</b> Usually classed as a hybrid between tenuifolium and martagon album but is more probably a sport, comes true from seed, carries numerous rich orange yellow flowers .....	.40 each, 4.00 doz., 30.00 per 100
<b>Extra large bulbs,</b>	
Fine flowering bulbs,	.25 each, 2.50 doz., 15.00 per 100
<b>Testaceum.</b> The gloriously beautiful Nankeen Lily is the only known natural hybrid lily in existence, a cross between candidum and chalcedonicum. It should be planted shallow and prefers a well sweetened soil. Should be planted in fall, 4 inches deep, in spring only from pots. The exquisite nankeen yellow flowers are carried 6—12 to a stalk and open in late June and early July. There is a demand for this lily far in excess of the supply. We have a large stock of splendid bulbs.	
Strong flowering size .....	1.50 16.50
Good flowering size .....	1.00 10.00
<b>Tigrinum.</b> The old Tiger lily often seen growing splendidly about abandoned homes and along roadsides, gives a fine touch of color in mid-August, splendid for naturalizing.	.20 each, 2.00 doz., 12.50 per 100
<b>Tigrinum Flore-Pleno.</b> A double form which is very pleasing, flowers a little later than the single form, rather less brilliant in color .....	.30 3.00
<b>Tigrinum Fortunei Giganteum.</b> Extremely vigorous, growing 6 feet or more in height, sometimes carrying 30—50 flowers per stem, color salmon orange spotted deep purple.	.25 each, 3.00 doz., 20.00 per 100
<b>Tigrinum Splendens.</b> An especially fine form with rich deep orange flowers, spotted black. By planting in late spring vigorous stalks may be had in flower as late as September 15 .....	25 each, 2.50 doz., 18.00 per 100
<b>Umbellatum.</b> Early and very free flowering hybrids, coming in many shades of color in season during June and early July. Fine mixture.	.20 each, 2.00 doz., 12.50 per 100
<b>Umbellatum Apricot.</b> Of a lovely rich apricot shade, husky grower, carries 8-10 flowers per stock .....	.50 5.00
<b>Umbellatum Darkest of All.</b> Remarkably fine deep red .....	1.00 10.00
<b>Umbellatum Erectum.</b> Fine form, sturdy habit, rich red flowers freely produced .....	25 each, 2.50 doz., 18.00 per 100
<b>Umbellatum Feu Brilliant.</b> Rich orange red, extra large flowers, fine variety .....	.30 3.00
<b>Umbellatum Golden Fleece.</b> A superb variety, large umbellate heads of golden yellow flowers. Vigorous and very effective, a sterling novelty ...	.75 8.00
<b>Umbellatum Grandiflorum.</b> Extremely fine orange red form.	.25 each, 2.50 doz., \$18.00 per 100

	Each Doz.
<b>Umbellatum Incomparabile.</b> Splendid dark red form. .25 each, 2.50 doz., 18.00 per 100	
<b>Umbellatum Mahony.</b> This beautiful deep crimson variety is admired by all who see it, dwarfer than Darkest of All and flowers later, is sometimes listed as Mahogany in European catalogues. Everyone seeing this lily wants to buy it. We have a grand stock and can offer it at attractive prices .....30 each, 3.00 doz., 20.00 per 100	
<b>Umbellatum Orange-man.</b> Rich orange and with extra large flowers. .25 each, 2.50 doz., 18.00 per 100	
<b>Umbellatum Prince of Wales.</b> Early splendid yellow variety, extra large flowers .....1.00 10.00	
<b>Umbellatum Sappho.</b> Very good light orange red variety. .25 each, 2.50 doz., 18.00 per 100	
<b>Umbellatum Splendidum.</b> The finest of all the highly colored varieties, rich vermillion and orange, very strong grower, carries immense heads of bloom ..... .30 3.00	
<b>Umbellatum Vermilion Brilliant.</b> Blood red flowers, with crimson shading, lightly spotted black. A grand variety ..... .30 3.00	
<b>Wallacei.</b> Warm apricot with rose shading, a charming Japanese form of elegans flowering in August .... .30 3.00	
<b>Washingtonianum.</b> A beautiful Pacific Coast lily flowering in late June. The fragrant flowers open white, turning purplish pink as they age, 25 or more flowers are carried on good stems. This variety should be given a well sheltered position or winds will spoil the lovely but rather fragile flowers. Our bulbs are cultivated and not to be compared with the badly dried up collected ones usually sold. Extra large bulbs, .75-1.00 each, 8.00-10.00 doz.	
<b>Willmottiae.</b> Miss Willmott's lily is vigorous and hardy, attaining when established a height of 5—6 feet and carrying up to 30 flowers per stem. The recurring flowers are of a vivid reddish orange color and appear about mid-July. The foliage is graceful and the plant of a very refined appearance. Extra large bulbs ..... .60 7.00 Strong flowering size ..... .50 5.00 Nice flowering bulbs ..... .30 3.50	

Additional to the foregoing list we have small stocks of a number of other new or scarce varieties, names and prices of which will be gladly forwarded on application.

We cordially invite all interested in these bulbous aristocrats to come and look over our beds the coming season, a few blooms open in late May, during June and July numerous varieties will be found flowering, others extend the season through August and September until late October. We will have a good many varieties in pots blooming ahead of the outside dates.

We ship Lilies to as distant points as New Zealand and South Africa, and make many shipments to Great Britain, France, Canada, and other countries.

## LILIUM SEEDS

A great majority of Lilies come quite readily from seeds. Some like regale and all its hybrids, Pride of Charlotte, Willmottiae, Davidi, Formosanum, Henryi, tenuifolium, umbellatum, candidum Salonica var., amabile, concolor, longiflorum, and elegans will usually germinate within a month. On the other hand auratum, speciosum, martagon, Marhan, the Backhouse hybrids, giganteum Himalaicum, and all North American varieties are very slow some requiring as much as 12 months to germinate, some of these will make a small bulb but no leaves the first season.

Sowing may be done under glass in the home in winter, or in cold frames or the open about May 1. Rather late fall before sharp frosts is another good time to sow seeds outdoors or in a frame. Started early, Formosanum will flower the first season, a number of others will bloom the second season.

Seeds may be sown in either shallow drills or broadcasted, cover not over  $\frac{1}{4}$  inch. For soil a mixture of garden soil, sand and either leaf mold or peat moss answers very well.

Unless otherwise priced seeds are 25 cents per pkt.; 12 vars., for \$2.00; larger pkts. for 50 cents and \$5.00 per doz. We will be happy to make up collections of easy germinating varieties for those wishful for a start in raising Lilies from seed.

Formosanum Late var.	Princeps

### NEW PRACTICAL BOOK ON LILIES

"Lilies and Their Culture in North America"

By William N. Craig

Covers the Culture of Lilies both in the Garden and Greenhouse, treats over 100 varieties. Profusely illustrated with full page plates. Covers such points as Lilies in History, Classification of Lilies, Geographical Distribution, Suitable Soils, Manures and Fertilizers, Lime and its Effects, the Value of Mulches, Depths to Plant Lilies, Preparation of Soils, Lilies for Special Permanent Purposes, Lilies for Cutting, Insect Pests and Diseases, Propagation, Lilies for Pot Culture and Forcing, Notes on Varieties.

This, the first work on Lily culture in America, has been warmly praised by the Horticultural press of both America and Europe. 144 pages.

Price \$3.00 postpaid from the Author in Weymouth, Mass., or The Florists Publishing Co., South Dearborn Street, Chicago, Ill.

### The Lily Year Book For 1935

Published by the Royal Horticultural Society in England. Contains splendid articles on Lilies. Finely illustrated. 145 pages with index. Of great value to everyone growing Lilies. Have a supply of this splendid Year Book and can mail promptly on receipt of orders. Price \$2.00 per copy.

## DUTCH AND OTHER HARDY BULBOUS PLANTS

We carry only the highest grade of bulbs purchasable no matter whether foreign or American grown. In Tulips the highest grade of bulbs obtainable are carried, while in Narcissi we handle only what are known as "double nosed" bulbs. We cordially invite would-be buyers to inspect our stock and note the quality as compared with the inferior grades offered at prices sometimes a little lower but often much higher.

Virtually all Dutch grown bulbs and domestic narcissi are here by September 15, many of them earlier. In the present list a number of obsolete varieties have been dropped and superior kinds take their places, this is especially true in the Darwin and May Flowering sections of Tulips.

Where orders are required by mail, customers should include sufficient in their remittance to cover cost of Parcel Post. Large orders are shipped per express but can be divided into several packages and go per mail when necessary.

### DARWIN TULIPS

	Doz.	100
<b>Afterglow.</b> Deep rosy orange, salmon tinted edges, inside deep orange, very fine .....	\$.75	\$5.50
<b>Anton Mauve.</b> Bluish lilac, enormous flower .....	.75	6.00

<b>Vulcan.</b> Strawberry red edged, buff yellow, inside rich apricot .....	.80	6.50
Choice mixture of Breeder Tulips ....	.60	4.50

## MAY FLOWERING OR COTTAGE TULIPS

The May flowering tulips start to bloom about May 15 and some varieties are in fine condition until early June. Some varieties are quite fragrant, all are graceful in habit usually with longer and more pointed buds than other types. They are excellent in clumps in flower borders, some naturalized finely in grass lands, all are quite persistent. Their popularity steadily increases.

	Doz.	100
<b>Adonis.</b> Reflexed very long petals, vivid carmine red with white base..	\$.75	\$5.50
<b>Albino.</b> Lovely creamy white .....	.75	6.00
<b>Amber.</b> Very unique color, terracotta shaded amber, base yellow with some blue .....	.70	5.50
<b>Argo.</b> Yellow stippled red .....	.70	5.50
<b>Avis Kennicott.</b> Magnificent large rich yellow .....	.65	5.00
<b>Bouton d'Or (Syn. Ida).</b> Pure golden yellow .....	.50	4.00
<b>Buff Beauty.</b> Lovely salmon orange, shaded buff .....	.85	6.50
<b>Carrara.</b> A magnificent snow white variety. Has charmed everyone who has seen or grown it .....	.80	6.00
<b>Dido.</b> Superb variety, inside bright salmon rose, yellow base bordered green. Outside orange red with carmine shade and orange shaded edges	.60	4.50
<b>Dulcinea.</b> Robust round flower, inside glowing orange, with yellow and greenish base, outside vivid red ....	.60	4.50
<b>Elegans lutea pallida</b> (Leghorn Bonnet). Lovely soft yellow, long pointed flower .....	.75	5.50

	Doz.	100
<b>Ellen Willmott.</b> Soft creamy yellow, reflexed petals .....	.50	4.00
<b>Fairy Queen.</b> Rosy heliotrope, margined amber yellow .....	.50	4.00
<b>Gesneriana lutea pallida</b> (Mrs. Keightley). Pale primrose, fragrant, fine form .....	.75	6.00
<b>Gesneriana major</b> (spathulata). Brilliant scarlet with blue black centre, grand late variety .....	.50	4.00
<b>Golden Goblet.</b> Fine cup shaped pure yellow .....	.70	5.50
<b>Grenadier.</b> Dazzling rich orange, height 21 inches .....	.55	4.00
<b>Hebe</b> (Lily flowered). Beautiful salmon rose .....	.70	5.50
<b>Honeymoon.</b> A tall pale yellow similar to Moonlight, 28 inches, a grand acquisition .....	.75	6.00
<b>Inglescombe Pink</b> (Salmon Queen). Rosy pink with blue green centre ..	.50	4.00
<b>Inglescombe Yellow.</b> Large glossy yellow flowers, much used as a yellow Darwin. Height 28 inches .....	.50	4.00
<b>John Ruskin.</b> Salmon rose edged light yellow, inside rose lilac and margined yellow, justly popular, 20 inches .....	.60	4.50
<b>La Merveille.</b> Soft orange apricot tinted rose, large elegant flower ...	.50	4.00
<b>Leda.</b> Beautiful glowing salmon pink .....	.70	5.50
<b>Lemon Queen</b> (Mothers Day). Light yellow, tall and late .....	.70	5.50
<b>Marvel.</b> Inside old gold, outside salmon rose, yellow edges very fragrant .....	.70	5.50
<b>Moonlight.</b> Large pale yellow elongated flower .....	.50	4.00
<b>Mothers Day</b> (syn. Lemon Queen).		
<b>Mrs. Francis King.</b> Lovely salmon rose .....	.80	6.00
<b>Mrs. Hoog.</b> Pale canary yellow, large flower on tall stem .....	.75	6.00
<b>Mrs. Kerrel.</b> Orange pink, blue centre, white border .....	.65	500
<b>Mrs. Moon</b> (Felgens maxima lutea). Very beautiful deep yellow with reflexing petals .....	.60	4.50
<b>Orange King.</b> Glowing deep-orange, much substance, the best with reflexing petals .....	.60	4.50
<b>Orange King.</b> Glowing deep-orange, much substance, the best of this shade .....	.50	4.00

<b>Yellow Crown (Golden Crown).</b> Yellow, edged red .....	.55	4.00
<b>Fine mixture Cottage Tulips</b> .....	.50	4.00

### TRIUMPH TULIPS

A new race of tulips, a cross between the Single Early and Darwin types. They are very useful in border plantings on account of their strong stems and unique colors. In height they are intermediate between the two types as well as in their period of flowering. The following are four of the best varieties.

	Doz.	100
<b>Canada.</b> Dark rose, creamy white in centre of each petal, yellow base with broad white margin, a thrilling ensemble .....	.60	4.50

## ROMAN HYACINTHS

These popular bulbs are not hardy but are splendid for indoor culture and flower much earlier than the larger Dutch hyacinths.

	Each	Doz.
Pure White, Pink, Blue .....	\$.15	\$1.50

## NARCISSI

There has been a tremendous increase in the interest in Daffodils within the past year and we have included in the present list numerous additions of the less common, new and unusual varieties raised by European hybridists. These hybrids are tremendous advances over the old standard varieties and are the results of years of painstaking work by such noted hybridists as Mrs. Backhouse, Williams, de Graaf, Van Waveren, Barr, Brodie and others.

We would draw attention to the fine selection of varieties we offer for the Rock Garden, a selection of which will give flowers over a quite long season.

We handle only the finest quality of double nosed bulbs and invite an inspection of our stock. Also a visit to our gardens in Daffodil time.

## LARGE TRUMPET SECTION

	Doz.	100
<b>Aerolite.</b> A beautiful variety with deep golden trumpet and primrose perianth, an outstanding daffodil ..	\$1.50	\$11.00

<b>Canaliculatus.</b> (See Rock Garden daffodils.)		
<b>Juncifolius.</b> (See Rock Garden daffodils.)		

### ROCK GARDEN SECTION

Virtually all of these varieties are suitable for the rock garden in addition to the sweet jonquils and some others already listed. Some like Queen of Spain, Salmonetta, William Goldring, W. P. Milner and Thalia are also fine for naturalizing where grass

is not too coarse. Cover bulbs 6—8 inches deep for best success. Many failures are due to too shallow planting.

	Each	Doz.
<b>Bulbocodium.</b> The Hoop Petticoat of Medusas Trumpet daffodils are very charming in the rock garden. We offer several varieties of this type.		
<b>Bulbocodium Citrinus.</b> Beautiful pale citron flowers 6—8 inches high, likes a damp position and enjoys a soil with peat and leaf mold .....	\$.15	\$1.50
<b>Bulbocodium Monophyllus.</b> Little snowy white flowers of great beauty. Give no manure .....	.25	2.50
<b>Bulbocodium Conspicuum.</b> Rich golden yellow of hoop petticoat like form and fine rush like foliage. Likes sandy peat .....	.15	1.25
<b>Canaliculatus.</b> Dainty little gem, give full sunshine. Heads of 3—4 flowers have white perianth and yellow cup, very fragrant .....	.15	1.50
<b>Circlet.</b> Flat creamy white perianth, petals touching and overlapping, fine poeticus like disc covering 1/3 the area of the petals .....	.40	4.00
<b>Cyclamineus.</b> Rich yellow trumpet, perianth reflexed like a cyclamen. Likes a moist location and a sandy peaty soil .....	.40	4.00
<b>Cyclamineus February Gold.</b> A hybrid from cyclamineus, perianth golden yellow, trumpet tinged with orange	.25	2.50
<b>Glitter.</b> Perianth and cup deepest golden yellow with glittering red edge. A choice little mite on an 8 inch stem .....	.15	1.50
<b>Johnstoni Queen of Spain.</b> Pure canary yellow, gracefully nodding trumpets of small size on 9 inch stems .....	.30	3.00
<b>Juncifolius.</b> A miniature rush leaved daffodil, 4—5 inches in height, small rich very fragrant yellow flowers.,	.35	4.00
<b>Minimus.</b> Smallest of all trumpet daffodils and the first to flower. We had blooms fully expanded on February 25 outdoors in 1933, only 3 inches in height with pure golden trumpets. Succeeds well in loam ..	.30	3.00
<b>Minor.</b> A very scarce variety, grows 6 inches high, golden yellow perianth gracefully twisted, trumpet golden .....	.60	7.00
<b>Moschatus of Haworth.</b> A charming little daffodil from the Pyrenees, snowy white with a drooping perianth, likes a little shade .....	.35	3.50
<b>Nanus.</b> A miniature golden trumpet daffodil 4—5 inches high, about intermediate between minimus and minor in size, very early .....	.30	3.00
<b>Salmonetta.</b> Very charming dwarf Leedsii, white perianth and salmon tinted cup often carries twin flowers	.10	1.00
<b>Triandrus Agnes Harvey.</b> A dainty daffodil of drooping habit, snow white, flowers carried 1—3 per stem, naturalizes finely .....	.20	2.00

	Each	Doz.
<b>Triandrus Calathinus.</b> An exquisite little daffodil, the drooping clusters of new white flowers are carried two and three per stem .....	.60	7.00
<b>Triandrus Albus.</b> The dainty little "Angels Tears" narcissus, pure white flowers. Likes a rather gritty soil .....	.15	1.50
<b>Triandrus Thalia.</b> A hybrid with Triandrus as one of the parents, carries 3—4 flowers per stem which are snowy white in color, sufficiently robust to thrive in the average garden border, a truly exquisite variety better known as the "Orchid narcissus" .....	.20	2.00
<b>Triandrus Moonshine.</b> An exquisite hybrid, star shaped creamy white flower often 3 to a stem drooping gracefully .....	.50	6.00
<b>Triandrus Mrs. Alfred Pearson.</b> White perianth and pale primrose cup, dainty star shaped flowers .....	.20	2.00
<b>W. P. Milner.</b> A charming pure white free blooming variety, naturalizes well .....	.25	2.50
<b>William Goldring.</b> The "swans neck" daffodil, primrose passing to white and very graceful, quite a robust grower, but its habit makes it fit in well in the rock garden .....	.20	2.00

<b>Plumosus (Feathered hyacinth).</b> Rich purple spikes. Blooms in June .....	.50	4.00

---

**FRITILLARIA**

Fritillaria Imperialis is tall and stately growing, a yard in height and flowering in late April in New England, their large lily like flowers are very handsome. The varieties of meleagris which bloom in May are fine in the border, rock garden or for naturalizing, all stand considerable shade.

		Each	Doz.
<b>Imperialis Maxima Lutea.</b> Yellow Crown Imperial, very robust striking plants, flowering in late April..	\$ .50	\$5.00	
<b>Imperialis Maxima Rubra.</b> Red colored variety, grows 2—3 feet high..	.50	5.00	
<b>Imperialis Orange Brilliant.</b> Rich orange color .....	.40	4.00	
	Doz.	100	
<b>Meleagris.</b> The Guinea Hen Flower is well suited for naturalizing .....	.50	4.00	
<b>Meleagris Alba.</b> Charming pure white form for the rock garden .....	.50	4.00	
<b>Meleagris Purple King</b> .....	.60	4.50	

### DUTCH IRIS

These bulbous iris are the results of crossing Hispanica on such varieties as filifolia, tingitana, lusitanica and others. They have more robust stems than the Spanish iris, also blooming in advance of them. All of these Iris are fine in the garden being perfectly hardy if planted in well drained ground an average of 4 inches deep. They flower just as the bearded (German) iris are passing. Prices are now within the reach of all.

<b>Blue Horizon.</b> Delightful shade of blue	\$ .50	\$4.00
<b>D. Haring.</b> Creamy white falls, standards silvery lavender .....	.50	4.00
<b>Golden Bronze.</b> A lovely bronze .....	.60	4.50
<b>Golden Glory.</b> Standards golden yellow, falls darker .....	.55	4.00
<b>Jacob de Wit.</b> Standards and falls both dark blue .....	.60	4.50
<b>Imperator.</b> Large free flowering dark blue, later than the regular Dutch varieties .....	.60	4.50
<b>Poggenbeeck.</b> Dark blue, an especially rich color .....	.60	4.50
<b>Van Ravenstein.</b> Pure pearly blue, color of Scabiosa caucasica .....	.50	4.00
<b>Wedgewood.</b> Beautiful Wedgewood blue, very early .....	.75	6.00
<b>White Excelsior.</b> Extra large snowy white variety .....	.55	4.50
<b>Yellow Queen.</b> Golden Yellow .....	.60	4.50

### SPANISH IRIS (IRIS HISPANCIA)

These bulbous Iris are splendid for culture in the garden flowering immediately after the bearded section (Germanica). Plant late in the fall covering 4 inches. They are perfectly hardy in New England. For forcing they are unexcelled.

<b>Cajanus.</b> Canary yellow, orange blotches on falls .....	\$ .50	\$4.00
<b>King of the Blues (Count of Nassau).</b> Fine rich purplish blue .....	.50	4.00
<b>King of Whites.</b> Rare white .....	.50	4.00
<b>King of Yellows.</b> Golden yellow ....	.50	4.00

### ENGLISH IRIS (IRIS ANGLICA)

We are glad to be able to offer a fine selection of these beautiful Iris in separate colors for the first time. They flower after the Spanish and Dutch vari-

eties have finished and considerably extend the season. The stems are sturdier and the flowers larger than the other bulbous types while the colors are especially rich. Given good drainage and planted 6 inches deep these have proved perfectly hardy with us.

	Doz.	100
Ideal. Pale mauve heliotrope .....	\$1.00	\$7.50
King of the Blues. Rich dark blue, very lovely .....	1.00	7.50
Mont Blanc. A very fine snow white..	1.00	7.50
Prince Albert. Delicate silvery blue ..	1.00	7.50
Queen of the Blues. A very pure blue	1.00	7.50
The Giant. An immense dark blue, outstanding .....	1.50	11.00
Mixed Colors. All are splendid flower- ing size .....	.75	6.00

### MISCELLANEOUS IRIS

Iris Reticulata. A perfect gem for culture in the rock garden, a very early bloomer .....	\$1.50	\$10.00
Iris Reticulata var. Contab. Of a love- ly Cambridge blue color, flowers 10 days earlier than reticulata, carries 2—4 flowers per bulb, in bloom first week in April .....	.50	each, \$6.00 doz.

### CAMASSIAS

Camassias are interesting and very attractive hardy bulbous plants from the Western Northern American states. They are best planted in the fall 6 inches deep in any good soil, but avoid fresh manures. They enjoy plenty of moisture during the growing season, in fact in their native habitats they are often standing in water when in flower, through the summer they succeed best if allowed to dry out very thoroughly. They add great interest to the spring bulbous garden.

Leichtlini. Robust variety, much the best of the family, often 3 feet high, flower scapes are usually clear blue but occasionally white .....	\$1.50	\$12.00
--	--------	---------

### CONVALLARIA (LILY OF THE VALLEY)

Fortin's Giant. Far the best variety for outdoor plantings, spikes and bells much larger than the varieties used for forcing. Strong pips,	1.00 doz., 7.50 per 100, 70.00 per 1,000
Polygonatum (Solomon's Seal). Splen- did for shady locations, strong field grown .....	\$2.00

### EREMURUS (FOXTAIL LILY)

These strikingly beautiful hardy desert plants come to us from the mountains of Western and Central Asia. My first planting of them in Massachu-

setts was as long ago as 1900. Their large octopus-like roots should be planted in the fall preferably in well drained soil which should contain plenty of either peat moss or leaf mold with a good addition of sharp sand. Cover the roots about 5 inches and the central crown rather less. Growth starts very early in the spring and to prevent injury to the shoots draw earth about them and tuck some sore of evergreen branches around them to protect them. Spikes will raise to a height of 10 feet or more on well established plants and their sturdy stalks from which pushes 2—3 feet of flowers in late May are thrilling to all flower lovers. Lay a piece of tar paper over crowns in winter to shed water although they usually do not require this care. Protect with salt hay or leaves over winter. We only offer strong flowering sized roots.

	Each
Bungei. Golden yellow, a dwarfer grower than others .....	\$1.50, \$2.00
Elwesianus. Very robust, flowers are soft pink ..	3.00
Elwesianus Albus. A lovely pure white form, very good grower .....	3.00
Himalaicus. An extra vigorous grower, color pure white .....	2.00
Him-Rob. A charming hybrid intermediate between Himalaicus and robustus, has great vigor .....	3.00
Robustus. Extremely husky grower, color rich rosy pink .....	2.00
Shelford var. Isobel. Pink with orange shading ..	2.50
Shelford var. Rosalind. Lovely bright pink ..	3.00
Shelford White Beauty. Splendid new white ..	3.00
Sir Michael. Another of the more recent hybrids, lively golden yellow .....	3.00
Tubergeni. One of Van Tubergen's fine hybrids, rich yellow, late bloomer .....	3.00

## LEUCOJUM

The summer snowflake carries several of the large snowdrop like white bells to a stalk, in foliage and bulbs suggestive of narcissus. Enjoys rather moist ground but thrives in an ordinary perennial border.

Doz. 100

Aestivum. Grows 18 inches in height producing its pendulous flowers on sturdy stems in May .....	\$.75	\$6.00
Vernum (Spring Snowflake). An early bloomer only 6—8 inches high carrying pretty nodding green and white flowers. The Leucojums are better left undisturbed from year to year ..	.85	6.50

## COLCHICUM

These fall flowering meadow saffrons are often called "fall crocus" but they differ materially from the latter making quite large bulbs which carry a number of flowers each, they also grow taller than the true crocus and produce their large leaves the following spring, the regular flowering time is late September and October.

Each Doz.

Autumnale (Commonly called "Autumn Crocus"). Very free blooming of easy culture .....	\$.25	\$2.50
Autumnale Alba. Pure white, increasing fast .....	.30	3.00

	Each	Doz.
<b>Autumnale Major.</b> Extra large rosy purple flowers .....	.30	3.50
<b>Autumnale roseaplena.</b> Double rosy pink .....	.30	3.00
<b>Bornmuelleri.</b> Long tubed rosy lilac flowers, very fine .....	.35	4.00
<b>Speciosum.</b> Deep rosy purple .....	.30	3.00

---

## AMARYLLIS

<b>Halli (Lycoris squamigera).</b> The hardy amaryllis carrying lovely lavender pink spikes of flower in August, plant 8 inches deep. Bulbs are scarce .....	\$1.00	\$10.00
<b>Large flowered hybrids for indoor culture, mammoth bulbs .....</b>	<b>.50</b>	<b>5.00</b>

---

## ORNITHOGALUM (STAR OF BETHLEHEM)

Interesting and easily grown spring flowering bulbs, they are very hardy and increase rapidly.

	Doz.	100
<b>Arabicum (Arabian Star of Bethlehem).</b> Large umbels of pure white flowers, protect well in winter, forces finely .....	\$.80	\$6.50
<b>Umbellatum (Star of Bethlehem).</b> Small white very hardy variety seen in many old gardens, fine for naturalizing .....	.50	4.00

---

## IXIOLIRION

No hardy bulbous flowers have attracted so much attention in our gardens this season as the IXIOLIRIONS. These bulbs are natives of Central Asia and belong to the natural order Amaryllidaceae. They are absolutely hardy in New England gardens and in one garden in Gardiner, Maine, have flowered continuously for 16 years. They enjoy a light, porous and well drained soil and bulbs are better covered 6 inches. Plants attain a height of 18-24 inches and the flower heads are very well branched. Flowers are in season after all tulips have passed in early June. The rather open but tubular shaped flowers are of a very lovely deep blue color and average 2 inches in diameter. Everyone planting and flowering these bulbs will be thrilled with their beauty.

	Doz.	100
<b>Ledebouri.</b> Lovely blue tubular shaped flowers, blooms just ahead of I. Pallasi and is slightly paler in color ...	\$1.00	\$7.50
<b>Pallasi.</b> The umbels of heavily branched rich blue flowers are very lovely .....	.75	6.00

## STERNBERGIA

The Sternbergias carry large upright crocus like flowers in fall and have been given a variety of common names like "Lily of the Fields," "Autumn Daffodil" and others. They like a warm, well drained soil such as a rockery affords and should be planted 8 inches deep.

	Doz.	100
Lutea. Large clear yellow crocus like blooms in October .....	\$2.00	\$15.00

---

## FREESIAS

	Doz.	100
Golden Daffodil. Very large yellow, extra sized bulbs .....	\$.50	\$4.00
Elders Giant White. Much the largest and finest white .....	.60	4.50
Purity. Still the leading variety for pot culture and cutting .....	.40	3.00

**Note.** Bulbs of Freesias are ready in late July, they can be planted in pots as late as December. Excellent for house culture.

## ANEMONE

**St. Bridget Irish Champions.** The largest and finest strain of these popular Anemones ever offered in this country, in a wide range of colors, 90 per cent will come double.

.60 per doz., \$4.50 per 100

## NATIVE MATERIAL FOR FALL PLANTING

**Arisaema triphyllum** (Jack in the Pulpit), extra strong ..... 15 each, \$1.50 doz.

**Cypripedium acaule.** An excellent variety, will thrive well under pine trees. Upper sepals and petals brownish, labellum pinkish purple with dark veinings.

**Cypripedium arietinum** (Ramshead ladyslipper). Choice and very rare. 75 cents each.

**Cypripedium parviflorum.** Bright yellow variety with small flowers.

**Cypripedium pubescens.** A beautiful and persistent yellow variety.

**Cypripedium spectabile** (Reginae). A truly noble variety, sepals white and roundish, labellum white or pale pink.

**Prices of Cypripediums except arietinum.** 20 cents each, \$2.00 per doz. Extra strong clumps 50 cents to \$2.00 each, according to number of pips.

**Erythronium albidum** (White trout-lily) \$1.00 doz.

**Erythronium Americanum** (Common trout-lily). \$1.00 doz.

**Trillium erectum.** Purple Trillium.

**Trillium grandiflorum.** Great snowy Trillium, the finest variety.

**Trillium nivale.** Nodding white Trillium.

**Trillium recurvatum.** Prairie Trillium, dark purple, rare.

**Trillium stylosum.** Rose Trillium, rosy pink flowers.

**Trillium undulatum.** Painted Trillium, early bloomer, flowers have scarlet markings.

**Prices of Trilliums.** 10 cents each, \$1.00 doz., \$7.50 per 100.

	Each	Doz.
<b>Mertensia Virginica (Virginia Blue-bells).</b> Extra strong roots .....	\$.30	\$3.00
Good flowering roots .....	.20	2.00
<b>Sanguinaria Canadensis (Bloodroot).</b> Strong flowering roots .....	.15	1.50
<b>Dodecatheon media.</b> The well known "Shooting Star," strong cultivated bulbs .....	.20	2.00

## CHOICE IMPORTED DELPHINIUM SEEDS

We import both choicest mixtures and named varieties of the finest English strains. Fresh seeds have just arrived and can be sown in a cold frame now or started during winter under glass.

	Per pkt.
Blackmore & Langdon's Gold Medal, the finest strain extant .....	\$.50
Blackmore & Langdon's Gold Medal. Choice named varieties, dark and pale blue .....	.50
Hollyhock Delphinium in choicest mixture ....	.50
Hollyhock Delphinium in 6 named varieties ....	.50
Collection of 6 pkts. of the finest named Delphiniums for \$2.00.	

## HARDY ROSES

We carry a selection of over 150 varieties of Hardy Roses including all of the best Hybrid Teas, Hybrid Perpetuals, Climbers, Polyanthas, Rugosas, and Species. Late October and November are splendid planting periods. We have many of the leading novelties. Special list on request.

## ROCK GARDEN PLANTS

We have in stock a very fine assortment of plants for Rock Gardens including Saxifragas, Drabas, Arenarias, Androsaces, Sempervivums, Sedums, Aubretias, Helianthemums, dwarf Iris, Erinus, Veronicas, Primulas, and other varieties, also hardy Ericas, Pachistimas, Cotoneasters, small leaved Euonymus and other plants.

## HARDY HERBACEOUS PERENNIALS

Our exhibits of Herbaceous Perennials in Boston have been awarded a number of gold medals. We have in stock extra fine selections of Peonies, Iris, Delphiniums, Phloxes, Pentstemons, Scabiosas, Sidalceas, Asters, Aconitums, Aquilegias, Hemerocallis, Geums, Doronicums, Gypsophilas and other varieties, all of which will do very much better if planted in fall rather than spring.

We have 20 of the most outstanding of the new hybrid Hemerocallis, strong plants \$1.00 each, \$10.00 doz.

**Helleborus niger (Christmas Rose).** We can supply strong flowering plants of *niger praecox*, *niger altifolius* and *orientalis* at \$1.00 each, \$10.00 doz. Some extra strong clumps \$2.00 each. September and October are excellent months to plant both Hemerocallis and Helleborus.

## HORTICULTURAL SPECIALISTS

---

We always have in stock a good selection of choice Flowering Shrubs, Fruit Trees, Coniferous and broad leaved Evergreens, and hardy Climbers.

---

A few specialties always to be found here are:—

	100 Lbs.	Ton
<b>Quality Brand Sheep Manure</b>	\$2.50	\$45.00
<b>Pure Ground Bone</b>	2.75	50.00
<b>Canadian Hardwood Ashes</b>	2.50	45.00
<b>Vigoro.</b> 5 lbs., .50; 25 lbs., 1.75; 50 lbs., 2.75; 100 lbs., 5.00.		

**Ideal Holland Peat Moss.** The finest brand imported, indispensable for many garden purposes. Bag \$1.00, bale \$3.50, 10 bales \$32.50.

**Screened Oak Leaf Mold,** \$1.00 bushel, \$2.50 sack.

---

In buying bulbs it is well to remember that there are several grades. In the case of Dutch bulbs of all kinds, and the Narcissi and Iris now mainly grown on the Pacific Coast, the larger sized bulbs are always the best. We buy only the finest grades to be had. Cheaper offerings made are invariably of small, inferior sizes. That it pays to buy the best there can be no question. In the case of Liliums in which we specialize there are great variations in sizes. For instance, last year we had bulbs of regale over 20 inches in circumference which gave 30-40 flowers per bulb, but we offer small bulbs only 3-4 inches in circumference for those desiring to grow them. Prices are regulated by the sizes in the case of all Liliums. We urge more amateurs to grow lilies from seed.

We sell bulbs of all kinds in 6s at dozen rate and in 25s and 50s at 100 rate.

Free advice on all horticultural matters is always gladly given. Simply write or call up Weymouth 1110.
